

Defend your data and guard against system intruders 24/7/365 with Ignite Managed Firewall Services

Viruses, Malware, Worms, Trojans, Spyware... today's cyber criminals are using vastly more sophisticated techniques to break through firewall protection and compromise your business systems and data.

Keeping intruders out while enabling daily use of the Internet requires a comprehensive security policy, a solid firewall solution and constant monitoring to keep pace with internal change and evolving external threats.

Introducing Ignite Managed Firewall Services.

Creating a secure barrier between your network and outside internet users, Ignite's MFS allows you to off-load the complexities of firewall operation yet ensure you are doing the maximum to protect your systems and data.

Our dedicated security experts will work with you to perform a review of your firewall needs to develop and define your firewall security policy. We will then configure and install leading-edge firewall devices delivering strong security and market-leading performance.

And it doesn't stop there. Our experienced team of security analysts will make sure that your firewall is kept up-to-date, efficiently managed, and rigorously monitored 24/7/365.

And all for a low, fixed monthly fee.

Ignite Managed Firewall Services Key Features

- **Stop Internet Abuse**
Internet content filtering protects against Internet misuse and abuse, - improving productivity, reducing legal liability and conserving bandwidth.
- **No Capital Cost**
No need to train or employ a full-time network and security administrator or incur expensive operational costs.
- **Fire and Forget**
Ignite takes care of the complete Firewall solution, including hardware, installation, configuration, and ongoing management.
- **Small, Fixed Monthly Fee**
Utilise a leading-edge solution without any capital outlay by your organization - all hardware and maintenance costs are included.

about Ignite's Managed
Firewall Services**

Ignite Managed Firewall Services.

A comprehensive range of services to ensure systems security and data protection.

Ignite Managed Firewall Services use nothing less than industry leading, award-winning security appliances, certified to meet industry and market specific standards. As value-added support to the core firewall functionality, we also offer a layered set of security facilities to stop inbound and outbound attacks, including:

Security Monitoring

Our security engineers monitor and manage your firewall environment to help protect your systems and data from cyber intrusion and internal misuse.

Web Content Filtering

We'll maintain the security and performance of your network by restricting access to pre-determined web sites and inappropriate web content.

Gateway Anti-virus Protection

Block viruses before they get into your network - our solution, complimenting your existing antivirus suite, will help stop Worms, Spyware, Trojans and Malware in their tracks.

Firmware Security Updates 24/7/365

Our specialist team will ensure that Firewall rules are configured to specification and that all Firmware is kept up-to-date.

Priority Hardware Swap Out

Replacement firewall if your firewall fails - we'll send out a pre-configured replacement firewall at no extra cost to ensure you stay completely protected.

Hacker Detection with Intruder Prevention

Our threat detection system tracks network usage, alerts Ignite's security specialists in the event of suspicious activity and finds a resolution if necessary.

Bandwidth Reporting

We'll analyze bandwidth usage from an application or user and also help in identifying unofficial applications using bandwidth.

Auditing of Security Updates

We'll employ an advanced Firewall policy change management process to effectively monitor all policy changes and provide comprehensive firewall policy version control, auditing, tracking and logging.

Bespoke Network Security Solutions.

Ignite provides comprehensive Managed Firewall Services for a wide range of businesses and company sizes.

In addition we offer custom firewall and internet security solutions with the flexibility to fit to your company's exact requirements. These advanced services can be supplied as add-ons to our standard managed security services.
